INTRODUCTION

PROBLEM WORTH SOLVING

To Remove The Nepotism Associated With Commerce

The traditional and the e-commerce had its own problems. Despite the popularity e-commerce gains, it has its problems since it depends on banks, internet providers and the government to function. Collectively, these agents that e-commerce depends on to function are called middlemen.

Companies like MasterCard, Visa, PayPal, Perfect Money, AliPay, etc. Provided these services in collaboration with local banks and the governments of the transacting parties. But this had its problems. Transactions could be monitored and the identities of all parties involved are known. Similarly, these services took time to execute as well as were expensive.

One of the major downsides of e-commerce is that all the countries of the world are not given equal opportunities to buy and sell online from one another. For instance, some countries are barred from using one service or the other. E.g PayPal is not readily available to all countries. This nepotism meant that some countries tipped off smaller countries in terms of trans-border trades.

THE SOLUTION

And this is where SPESBaS Blockchain and it's ecosystem come to the rescue. With the technology of the blockchain, transactions are completely anonymous meaning that there is absolutely no way to either know the involved parties or where they originate from. This eliminates all forms of nepotism involved in traditional and e-commerce trades. Transactions also occur with light's speed and for fractions of their usual fees.

Blockchain and digital assets paved the way for a brand new industry where goods and services can be bought over the internet with digital currencies. Examples includes ALLIANCE Assets (ALTO) and SPESBaS Assets (DBaS).

These transactions occur via a decentralized technology. This means that all the middlemen involved in traditional and e-commerce transactions are completely cut off.

No banks. No Government. No credit card. Nothing.

The Complete Decentralized Commerce platform is what SPESBaS ecosystem is all about and the currencies for the operation of this platform are ALTO and DBaS.

1. SPESBaS DEX (SPESDEX)

SPESDEX is a part of SPESBaS Ecosystem, it is a comprehensive financial ecosystem of its own where users can Swap, Stake, Farm, Pool, Explore, and Bridge on SPESBaS Assets, currencies, and NFT Marketplace through the Automated Market Markers (AMM) without human interferences.

2. SPESBaS Purse (SPurse)

Another product of the SPESBaS ecosystem is the SPurse which can be used to store, trade, buy, sell, lend, borrow, and see Accurate Prices of SPESBaS Assets (DBAS, ALTO) and cryptocurrency.

3. SPESBaS Marketplace (SMarketPlace)

SMarketplace is part of SPESBaS ecosystem, a platform where every members of SConnect can Buy and Sell product and services with DBAS and ALTO at the lowest price in the world even up to 99.99% off on the largest web3 decentralized marketplace.

4. SPESBaS Connect (SConnect)

SConnect is part of SPESBaS Ecosystem which will be the first decentralized social media

A Decentralized Social Media Platform that connects People, Products, and Purse together in order to share, buy, sell, vote, verify, loan, and accredit using the signature called "CONNECT Spurse."

5. SPESBaS Metaverse (SMetaverse)

SPESBaS Ecosystem will also host our SMetaverse, a virtual reality world where users can interact, and experience things as they would in the real world which aims to pioneer virtual commerce innovations in the Metaverse by offering Virtual City, Virtual Retail Outlets for Brands, Virtual Commerce Marketplace, Advertising Brand and Create Payment Gateway.

6. SPESBaS AllBuyNSell (AllBuyNSell)

is also part of SPESBaS Ecosystem, a platform where everyone is a merchant, can buy and sell any products and services with SPESBaS Assets (DBAS and ALTO) and also buy and sell SPESBaS Assets (DBAS and ALTO) in the 'All world of Commerce'

Statement of Purpose

Helping the world to have a better commerce, physically, digitally and virtually where people can trade swiftly, peacefully and economically **without NEPOTISM** while utilizing the power of Blockchain and the latest technologies (AR, VR, AI, 3D, 5G, Web3:0 and Cloud Computing) to deliver complete decentralized commerce

BENEFITS

We'd like to offer all of the Sellers, buyers and logistics in the commerce industry a Decentralized System in an interconnected information system where no single entity is the sole authority. This is our offer back to the community we are trying to support.

Our aim is to build a Decentralized platform to help the Manufacturers, Manufacturer's Representative, Distributors, Wholesalers, Exporters, Importers, Retail Sellers, Retail Buyers, Shipping Logistics and Escrow Services...

- Showcase their product in a digital Decentralized platform where transaction is very fast, easy, and economical.
- Have simple management system
- Sell their product on All-In-One platform
- Freely communicate with each other through Discussion Boards.
- Earn SPESBaS Assets through community mining (Participation in Discussion Boards and other social events), as a potter as well as potting and setting PoT in motion
- Manufactures, Buy, Sell and offer Logistics Services and enjoy the SPESBaS Technology: a blockchain-based Commerce engine that allows manufacturers, buyers, Sellers and logistics have their own Smart Contract and benefits of sharing with SPESBaS Community Of manufacturers, buyers, Sellers and Logistics.

COMMERCE MARKET & BLOCKCHAIN APPLICATIONS

From traditional commerce to e-commerce and from e-commerce to Decentralized Commerce, this is where we stand.

Welcome!

With the increasing proliferation of online buying, selling and services and easy availability of the internet for almost every person, e-commerce are expected to have a continuous positive impact on the growth of the global economy.

In addition, the recent global pandemic (Covid-19) has made more businesses and individuals to buy and sell online; (Amazon is an example of this).

Further, with the rising popularity of the blockchain technology especially cryptocurrency, the e-currencies which is being replace by the cryptocurrency is witnessing an accelerated

growth from less than 1 Trillion Dollar in few months past to over 2 Trillion Dollar in Cryptocurrency market capitalization.

Some other factors of propelling the cryptocurrency are the empowering nature of the dApp System:

- Availability Of different industry going into the blockchain to function.
- Shifting From the traditional methods or online operation to decentralized platform.

Looking forward, the expert expects the global cryptocurrency to reach a value of US\$40 Trillion by 2026 exhibiting a rise of 1900% between 2021-2026.

In all the craze of Technology and growing revenue - there are the Core players of this industry: Manufacturers, Manufacturer's Representatives, Distributors, Wholesalers, Exporters, Importers, Retail Sellers, Retail Buyers, Shipping Logistics & Escrow Services Provider and Investors. These are the people that drive innovation. Their benefits, earnings and ways to showcase their products and services should be prioritized above all else. With this group in mind, we want to create a thriving community on SPESBaS System.

WHAT WE'RE TRYING TO SOLVE

For Manufacturers

- A better way to showcase their products
- Support in earning even more through enabling sales on SPESBaS Marketplace, building their own digital store and profile along with the right idea and tools to create new products or improve existing products.
- Finding the right projects or contract from other manufacturers/companies, along with interacting with future consumers who will use their products, merchandise and services.
- Growing customer base on SPESBaS Marketplace and through the entire blockchain spaces with the support of tools to offer coupons, marketing, instant recognition.
- Payments in crypto from clients, customers for the product and services with one of the world most powerful Assets (DBAS).
- Enabling collaboration on manufacturing with internal parties (within SPESBaS marketplace).
- Gain interest for your products- hold Buy contest and community event for buyers.
- Sell more products faster through the SPESBaS Subsidy's Program: SPESBaS uses some of the profit generated from the ecosystem to subsidize products prices; 1) Each product will gain coin as the demand from the community rises and 2) Every products attract a share added percentage from the total profits from the SPESBaS Ecosystem.
- Manufactures a product and earn royalty forever throughout the life time of the product.

For Traders

(Manufacturer's Representatives, Distributors, Wholesalers, Importers, Exporters, Retail Seller)

- Discover your perfect manufacturer, specific product developer, industry new product manufacturer.
- Buy and Sell manufactures' product including store front application to showcase on SPESBaS Marketplace.
- Enabling collaboration on product sales with your future partner.
- Make passive income by representing a manufacturer in a particular region.

For Buyer (Consumers/End Users)

- Buy product from your favorite sellers
- View portfolios of product, storefront from your favorite products.
- Join the Discussion Board to vote for your favorite product, services and win prizes.
- Community mining to earn SPESBaS Assets.
- 20% Revenue from all SPESBaS Subsidy's Program to Subsidies the most popular products in the community.
- Buying Analytics- Proof-of-Transaction to ensure both highest level of buy as well as generating SPESBaS Assets Passively.
- Buy product to earn SPESBaS Assets and grow in SPESBaS Market Rank.

USE CASES

ALLIANCE ASSETS (ALTO)

At the foundation of the whole platform will be ALLIANCE Assets. There will be multiple ways holders of ALLIANCE Token can benefit from holding ALTO.

- ALTO with DBAS will be the only cryptocurrencies to be used within the SPESBaS Ecosystem
- ALTO will be accepted for all business services and products with the SPESBaS business operations across the world

SPESBaS Assets (DBAS)

At the center of the whole platform will be SPESBaS Assets. There will be multiple ways users of SPESBaS Assets can benefit from using SPESBaS Assets.

- DBAS with ALTO will be the only cryptocurrencies to be used within the SPESBaS Ecosystem
- DBAS will be accepted for all business services and products with the SPESBaS business operations across the world
- DBAS will be the cryptocurrency for paying gas fee

TAX and FEES

ALLIANCE Assets (ALTO)

- 8% Tax - 2% Reflection and 6% Auto-LP
- For Each transaction - there will be “Reflection”: the 2% fee is subsequently distributed among all ALTO holders.
- The second component, 6% Auto-LP is the fee that will be paid to liquidity pool which will be used for auto buyback protocol - causing the price rise of ALTO.

SPESBaS Assets (DBAS)

- Transaction within SPESBaS Marketplace attract minimum tax fee
- Using SPESBaS Ecosystem attract minimum system fee.

SPESBaS Assets (DBAS) Earning & Mining

- 1) Manufacturers, Manufacturer’s Representatives, Distributors, Wholesalers, Exporters, Importers, Retail Sellers, Retail Buyers, Shipping Logistics & Escrow Services providers will earn SPESBaS Assets (DBAS) through sale of products and services provided through the SPEBaS Marketplace
- 2) By participating in the community discussion board, events, competition, SPESBaS Assets (DBAS) Holders will earn SPESBaS Assets.
- 3) By being a potter as a Manufacturer, potting by the Manufacturer’s Representatives / Distributors / Wholesalers, the Logistics, the Importers / Exporters / Retail Seller / Retail Buyer and by setting pot on a motion by the buyer / consumer, SPESBaS Assets (DBAS) will be earned.

Access To Transactions

- 1) The only way to access transaction view is to have hold SPESBaS Assets (DBAS).
- 2) For each transaction, in order to “unlock” it and start transaction, the users must buy access with SPESBaS Assets (DBAS).
- 3) There will be a possibility to trade products and services ONLY using SPESBaS Assets (DBAS).

Distribution of Revenues

- 50% will go toward SPESBaS Subsidy Program in the SPESBaS Marketplace
- 30% will go toward buyback of DBAS to keep the price stable and increase value for All DBAS Holders and to keep the continuation of the mining Process
- 19% will go toward buyback of ALTO to keep the price stable and increase value for All ALTO Holders.
-
- 1% will go to SPESBaS Inc.

Core Building Principles Of SPESBaS System

1. Transparent and Traceability

- 1.Traceability for manufacturer and all in the chain
- 2.Full transparency in re-sell/usage

2. Customized Distributions

- 1.Establish their own storefront/webpage
- 2.Showcase portfolio or products/services
- 3.Reach an engaging community of buyers

3. Decentralized Focused

- 1.Community voting and governance
- 2.Earn DBAS by being engaged
- 3.The community determines the price of products listed on SPESBaS Marketplace through PoT.

4. Matching Engine

- 1.A central place to connect Manufacturers, Manufacturer's Representatives, Distributors, Wholesalers, Exporters, Importers, Retail Sellers, Shipping Logistics & Escrow Services Provider, Investors and BUYERS
- 2 .Proof-of-Transaction for community mining.

PROPOSED CORE PLATFORM FEATURES

SPESBaS' Marketplace

Buy and Sell product and services with User Interface,

Manufacturer, Buyer, Sellers, and the Logistics Providers can advertise their products and services using SPESBaS Assets

Community Discussion Boards

- A Reddit-type of discussion board to express ideas, share new product/service information, in buying.
- Everyone will be able to vote for, against and earn SPESBaS Assets by sharing high-quality products/services, discussions or valuable answers.
- Depending on the level of SPESBaS Assets earned through Discussion Boards, everyone will gain Badges (from Newbie level to Expert).

Website and Portfolio Builder (Spaces)

- Manufacturers, Sellers, Buyers and Logistics can build their own profile on the platform depending on number of products, their quality, how well is their standing on Discussion Boards and the Ranking through SPESBaS Marketplace - the profiles can be more or less visible throughout the platform. Popularity of profiles will also depend on number of SPESBaS Assets that the user holds.
- Predefined themes will enable everyone to build their profiles and even spin-off their own standalone website to sell manufacturer products or present their portfolio. These websites will all be hosted through SPESBaS's servers.

Job and Project Matching

By providing a thriving community of Decentralized Commercialism, manufacturers, Buyers, Sellers, and Service Producers can explore various ways to collaborate with each other including support for their own projects as well as starting together new ones.

Matching manufacturers, buyers, sellers and service providers will ensure that both parties gain traction while using our platform for advertising their products/service and portfolios.

Commerce is the backbone of any society, this being true for even the virtual world where one form of exchange or another is required for sustainability. The metaverse is a virtual reality world where users can interact, and experience things as they would in the real world. Using current AR and VR tech, they can immerse into this world and interact with overlaying objects and people in the visual projected in front of them. **ALTO** aims to pioneer decentralized commerce innovations in the Metaverse by offering the following use cases:

- Provide virtual retail outlets for brands
- virtual commerce marketplace for manufacturers and wholesalers
- Advertising brand and product in the metaverse
- Create payment gateway for Metaverse projects

Provide virtual retail outlets for brands

The retail sector is the next major arena for experimenting with metaverse business opportunities. The experience of virtually walking through and shopping in your favorite retail store from the comfort of your home is quite exciting. Many brands already understand this and are working towards the Metaverse vision. This innovative feature can only be afforded by big retail brands due to high cost and the technical support required. Alto will provide the infrastructure and payment gateway to facilitate this innovation. Web 2.0 shopping is counterintuitive and repetitive. Clicking two-dimensional images on a flat web page does not replicate the real-life shopping experience.

Metaverse-based immersive shopping experiences can benefit businesses in the retail sector. Furthermore, the metaverse can be an excellent venue for launching new and sophisticated products.

Imagine going to a fashion store in the metaverse as a digital avatar. You can browse the store and its merchandise in the same way you would in the real world. You can dress your digital avatar in the clothes and accessories from the fashion store in the metaverse. As a result, you can see how a specific garment or pair of pants fits you.

With all web 3.0 protocols in place, Alto will partner with leading virtual reality developers to deliver top notch 3d immersive shopping for goods and services, thereby helping retailers own their own virtual storefront while receiving payment with ALTO

So, what does the future of global commerce look like?

Our take is that majority of manufacturers and wholesalers Will find a way to adopt the concept of virtual reality with the aim of improving service delivery with an experience that is so seamless and immersive that we will barely notice the distinction between the Metaverse and the Universe.

Manufacturers will have the ability to create a product and earn royalty forever throughout the life time of the product.

-Manufacturers and wholesalers will be able to Sell more products faster through the SPESBaS Subsidy's Program: SPESBaS uses some of the profit generated from the ecosystem to subsidize products prices;

- 1) Each product will gain coin as the demand from the community rises and
- 2) Every products attract a share added percentage from the total profits from the SPESBaS Ecosystem.

ADVERTISING BRANDS AND PRODUCTS IN THE METAVERSE:

It is fantastic to use virtual reality for advertising. VR forms can make advertising more potent and engaging because they provide a fully immersive experience. Using this strategy, people worldwide can work together to create advertisements.

ALTO will offer manufacturers the platform to reach wholesalers, offer wholesalers the platform to reach retailers, and finally offer retailers the platform to reach consumers using our Matching Engine which is A central place to connect Manufacturers, Manufacturer's Representatives, Distributors, Wholesalers, Exporters, Importers, Retail Sellers, Shipping Logistics & Escrow Services Provider, Investors and BUYERS

Create payment gateway for Metaverse projects:

Every single startup concept is an excellent one. But what's the sense of having a virtual world if people can't pay for it easily. With a lot of Metaverse projects springing up and offering various goods and services, There's need for an outstanding means of exchange that offers quality features for both buyers and sellers as They are unable to make payments in the Metaverse using their physical currencies.

As a result, Alto is developing a secure payment gateway system that consumers can rely on to handle their financial transactions.

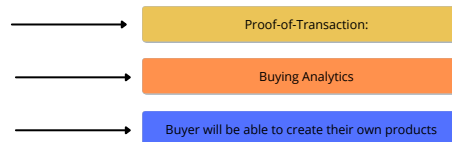

Security and cost of transactions are a major concern taken into consideration when receiving Payments in crypto from clients, customers for the product and services, Alto solves this by introducing one of the world most powerful Assets (DBAS)

Collaboration Tool

There are plenty of tools out there, but your products/services still not getting released on time? The weak link in the product/service design process boils down to one thing: collaboration. When you have hundreds of files, dozens of clients, and workers spread around the globe, you need one simple system to hold it all together. SPESBaS dApps aims to fulfill the need for a clear, easy, and fun toolkit for managing and integrating assets into your products/services.

SPESBaS Collaboration Tool will be created to be a user-friendly way to collaborate in a way that assumes only basic knowledge of computer.

And more, including Proof-of-Transaction (PoT)

- **Proof-of-Transaction:** Buyers can earn coins while buying product. A SPESBaS Product Client will be developed which serves 2 purposes: Analyzing buyer behaviors and actions to recommend and summarize reporting, the 2nd purpose of the product time serves as a Proof-of-Transaction when the more the buyer buys, the higher probability the buyer will earn SPESBaS Assets.
- **Buying Analytics:** To become a better Buyer, it's always better to study becoming a better buyer guide, payment, speed timing etc. - with the SPESBaS Buying Analytics, Buyers can be better at what they're buying.
- **Tournaments:** Buyers, Sellers, will be able to connect to different product to organize tournaments, the prize pools will consist of SPESBaS Assets put forward by the community and tournament participants.
- **Product Engine:** Buyer will be able to build/create their own products using our SPESBaS Product Engine on the Web Browser. This will be ultimately connected with SPESBaS Marketplace and Product Client/Analytics to create synergy and strong foundation of growth for the whole ecosystem.

Proof-of-Transaction Concept (PoT)

We will develop a concrete algorithm integrating Decentralized Commerce and Blockchain technology. Key advantages of using Proof-of-Transaction:

- It is more energy efficient than Proof-of-Work (Bitcoin).
- Certainly more fair than Proof-of-Stake (Ethereum) - where it favors nodes that has the largest ETH stake in the network.
- It's just more fun - buying product while mining and earning passive income? You bet.

The Proof-of-Transaction algorithm's main idea is that buyer who spend time and GPU computational power should be the ones that could create and validate blockchain's new blocks. The SPESBaS Assets are the main cryptocurrency of SPESBaS's upcoming SPESBaS Marketplace and will also be the main mining goal for PoT.

To implement this, there are certain conditions that have to be met:

- 1- The process of verifying (Potting) the Transaction should be difficult enough for bots to emulate and challenge human trick.
- 2- Mining algorithm should take minimal CPU / GPU / RAM resources to increase FPS while verifying online products.

Rules for creating and validating blocks. Key parts of the validation algorithm are:

- 1- Testifiers' Rank.
- 2- The amount spent in the transaction.
- 3- Core buyer behavior metrics: APM (Actions-Per-hours), Spend, Corporations, Economics, etc. - there will be a wide range of data that will be considered in the final model.
- 4- Potting process difficulty.

CONNECT THROUGH SPESBaS' BUYING CLIENT

Our Buying client will work in the background while communicating with the Product's API to determine the SPESBaS Assets earn by your PoT Rank

Note: PoT Rank is determined by: how long you've been buying, how many time you have been buying, how much you have been buying, how well behave you have been buying and to the community.

START YOUR TRANSACTION

- The PoT should be difficult enough for POTTING that only those who are involved in the transaction can participate.

MINE DBAS WHILE BUYING AND RANKING

- The mining algorithm should take minimal CPU / GPU / RAM resources to increase FPS while Potting a PoT. Based on time spent and quality, the Putting will have a chance to validate the next block of SPESBaS.

TIME AND POTTING QUALITY WILL DETERMINE HOW MUCH YOU MINE

- A new block can be created as soon as someone finishes a Potting. The waiting time should be short, so that's why most popular Potter's transactions will be chosen for mining SPESBaS Assets.

PROOF-OF-TRANSACTION IS THE GREENER ALTERNATIVE TO BITCOIN PROOF-OF-WORK, WHERE THE BLOCK REWARDS GOES TO SKILLED POTTING.

ALLIANCE Assets (ALTO)

ALTO is the Foundational Token for the SPESBaS dApp Ecosystem. The total supply is 1 Quadrillion Tokens, with Private Sale and Presale to round in total of 7.5 Trillion ALTO. The remaining will be released for the Public Sale as well as for periodically burns which ensures price rise stability. Including 6% tax buyback mechanism on each buy,sell or transfer. The transfer of ALTO V1 to ALTO V2 will be releasing 1% at the launch of ALTO V2 on Spesbas Chain and then 0.09% daily which ensures price stability after the launch.

Total Supply	100%	1,000,000,000,000,000
Private sale	0.25%	2,500,000,000,000
Presales	0.5%	5,000,000,000,000
Airdrop	0.25%	2,500,000,000,000
IDO/OTC	10%	100,000,000,000,000
Reserves (for periodically burns)	50%	500,000,000,000,000
Liquidity Fund	10%	100,000,000,000,000
Team	20%	200,000,000,000,000
Development & Marketing	5%	50,000,000,000,000
Partners	4%	40,000,000,000,000

Public Sale (ALTO)

After Private and Presale events, ALLIANCE Assets will be available for the general public after we launch on PancakeSwap and other DEX'es.

All ALLIANCE Assets from Presale/Private Sales are 100% released instantly at the time of purchase.

Pre-Sale Raise Allocations (ALTO)

In order to build SPESBaS Ecosystem, the team needs funding for:

- Liquidity - Keeping the ALTO-BNB LP balance at fixed level will ensure trading capacity for the public.
- Team - Team's compensation, including employees.
- Development - Start of SPESBaS development
- Marketing - Bringing in of Marketing expert in order to create a vibrant marketing strategies we need to get the word out.
- Charity - SPESBaS Assets Holders will participate in voting to which charity organization the fund will go.
- Advisors - To ensure high probability of success, a special board of advisors will be created to keep Team's goals and strategy in place.
- Reserve for Partnerships - Major Currency Exchanges (Binance), Big player in the e-Commerce, Manufacturing Companies and more.

SPESBaS Assets (DBAS)

DBAS is at the heart of SPESBaS Ecosystem. The maximum supply is set at 1 Billion Coin, with Private Sale and Presale rounds to be sold in total of 6,000,000 DBAS. The remaining will be released for the Public Sales as well as generated through Community Mining. The supply generated by private sales, presales and ICO will be releasing 1% at public launch and then 0.09% daily which ensures price stability after public launch.

Max Supply	100%	1,000,000,000
Private sale	0.1%	1,000,000
Presales	0.5%	5,000,000
Airdrop	0.4%	4,000,000
ICO	10%	100,000,000
Liquidity Fund	10%	100,000,000
Team	20%	200,000,000
Development & Marketing	5%	50,000,000
Partnership	10%	100,000,000
Reserves (Community mining	44%	440,000,000

Public Sales of (DBAS)

After Private and Pre-sales events, SPESBaS Assets will be available for the general public after we launch on DEX/CEX. All SPESBaS Assets from Pre-Sale / Private Sale will be released to investors in the following manner

- 1% at public launch.
- 0.09% daily afterwards.

Pre-Sale Raise Allocations for DBAS

In order to build SPESBaS Ecosystem, the team needs funding for:

- Liquidity - Keeping the Liquidity-Poll balance at fixed level will ensure trading capacity for the public.
- Community Staking - The funds will be intended for investors from Pre-Sale phases who will keep them for more than 3 months and make Coins transactions.
- Team - Team's compensation, including employees.
- Development - Platform technology development SPESBaS Marketplace, Collaboration Job Matching tool, Manufactures / Sellers Storefront, Buying Analytics, Proof-of-Transaction and Products Engine etc.
- Marketing - Bringing in of Manufacturers / Sellers as well as buyers and Logistics, in order to create a vibrant community we need to get the word out.
- Bounties / Platform Incentives - Special Prize Pools for attracting most important manufacturers / Sellers / Logistics to join the platform and offer their products and services.

- Bounties / Platform Incentives - Special Prize Pools for attracting most important manufacturers / Sellers / Logistics to join the platform and offer their products and services.
- Charity - SPESBaS Assets Holders will participate in voting to which charity organization the fund will go.
- Advisors - To ensure high probability of success, a special board of advisors will be created to keep Team's goals and strategy in place.
- Reserve for Partnerships - Major Currency Exchanges (Binance), Big player in the e-Commerce, Manufacturing Companies and more.

ROADMAP

Phase 1 - The Start - Q3/2021 - Q4/2021

Q3/2021

- Mainnet Launch
- Smart Contract (BEP20)
- Wallet Integration (ALTO)

Q4/2021

- ALTO's PreSale- 24th October 2021

Phase 2 - Building - Q1/2022 - Q4/2022

Q1/2022

- Start Of SPESBaS dApp Development - 3rd January 2022
- ALTO IDO start - 24th January 2022

Q1/2022

- ALTO Airdrop - 7th February 2022

Q3/2022

- SPESBaS Blockchain launch - 20th July 2022
- DBAS Private Sales - 20th July 2022
- DBAS Presale - 15th August 2022

Q4/2022

- DBAS ICO
- SPESBaS AllBuyNSell (AllBuyNSell) Launch

Phase 3 - Growth of the SPESBaS Ecosystem - Q1/2023 - Q4/2023

Q1/2023

- DEX (SPESDEX) launch
- DBAS Public Sales Launch
- Expansion of AllBuyNSell
- ALTO V2 Launch
- DBAS DEX listing (UniSwap-V2 & PancakeSwap-V2)
- SPESBaS Purse (SPurse) Release
- DBAS/ALTO listing on Coingecko
- DBAS/ALTO listing on CMC
- Expansion of AllBuyNSell

Q2/2023

- PESBaS MarketPlace Launch
- SPESBaS Connect (SConnet) Launch
- SPESBaS Metaverse (SMetaverse) launch
- ALTO/DBAS' CEX Listing
- Enlargement of SPESBaS Marketplace
- Partnership With Major E- Commerce Platform
- Partnership With Major Manufacturers
- Partnership With Major Product Distributors & Wholesalers

ROADMAP

Q3/2023

- Partnership With Major Exporters and Importers

Phase 4 - Expansion - Q4/2023 - Q2/2024

Q4/2023

- Growth of ALLIANCE Asset (ALTO)
- Growth of SPESBaS Asset (DBAS)
- Growth of SPESBaS Marketplace (SMarkeplace)
- Growth of SPESBaS Connect (SConnect)
- Growth of SPESBaS Purse (SPurse)
- Growth of SPESBaS Metaverse (Smetaverse)
- Growth of SPESBaS DEX (SPESDEX)

Q1/2024

- Expansion, Continuous Integration, and Deployment of SPESBaS dApps

Q2/2024

- ALTO/DBAS More Listing (DEX & CEX)

Team

Several awarded Certificates, among are certificate in Basics of Innovation Management, Digital Transformation, Leadership and Team Development, Marketing and Communications

Founder of SPESBAS and its related products. 20 years' experience in Import and export, have founded 3 companies, several innovative Investment Program, founded several NGOs, a leader in key positions in several international organizations, 10 years' experience in forex trading, 3 years' experience in crypto technology.
